

Product information

**Speick Woman
Facial Cleansing Milk**

Soothing, mild cleansing care

Speick woman facial cleansing milk is a plant-based product, which is also suitable for use on sensitive skin due to its mild and gentle ingredients. Protective oils and moisturising extracts (vegetable glycerine, sorbitol, glucose, Mannitol) optimise the hydro-lipid balance of the skin.

Speick woman facial cleansing milk contains soothing Aloe Vera gel, protective avocado oil, shea butter, sallow thorn and an extract from the alpine plant Speick, taken from biologically controlled wild cultures. Speick works to create a harmonious balance in the skin.

The product contains no artificial colourings, animal-based ingredients or preservatives. Speick woman facial cleansing milk contains aromatic properties derived from pure essential oils and complies fully with the “BDIH requirements for certified natural cosmetics”.

Tip: For cleansing purposes apply product to a cotton wool pad and wipe across the face in circular movements, starting with the forehead. The gentle massaging motion enhances the effects of the active ingredients.

Ingredients:

Aqua
Alcohol
Glycine Soja Oil
