

Product information

Speick Woman Deodorant

Certified natural cosmetics/BDIH

Speick woman deodorant, derived from plant-based ingredients, is long-lasting and effective due to its natural ingredients. The mild plant extracts also work to protect the skin.

Speick woman deodorant contains witch hazel water, sage extract, calendula extract, glycerine and an extract from the alpine plant Speick, taken from biologically controlled wild cultures. Speick works to create a harmonious balance in the skin.

A citric acid ester provides a natural deodorising action, preventing a build-up of enzymes which create unpleasant odours, whilst having no effect on the skin flora itself.

The product contains no artificial colourings, animal-based ingredients or preservatives. Speick woman deodorant contains aromatic properties derived from pure essential oils and complies fully with the "BDIH requirements for certified natural cosmetics".

Ingredients:

Alcohol
Aqua
Triethyl Citrate
Glycerin
Hamamelis Virginiana Distillate
Valeriana Celtica Extract
Salvia Officinalis Extract
