Speick Thermal
Natural cosmetics

Silicea + Alga
for sensitive skin

Day cream Nourishing and vitalising

Speick Thermal day cream, the vitalising light thermal cream for that little extra in protection from damaging environmental influences, for optimum moisturising care of the skin and to optimise the natural hydro-lipid balance.

Speick Thermal natural cosmetics contain pure juvenile water from the Schlangenbad thermal spring with dissolved silica and the unique, nourishing extract of the micro alga Spirulina platensis.

Only plant-based carefully matched raw materials are used for Speick Thermal natural cosmetics; this vitalising systematic care is vegan. All products contain the harmonizing extract of the Speick plant from the High Alps (certified organic harvesting).

Tip: Ideal as vitalising and refreshing pick-me-up for the skin. Before going out, spread cream around the eyes and gently dab in.
